RE: Data Engineer

Dear Director of Human Resources,

After learning of the Data Engineer opening with YoungInnovations Inc Pvt Ltd, I am attaching my resume in consideration for this role. I graduated from Itahari International College with a Bachelor of Computer Science in Computer and Information Sciences. I have researched and learned a great deal about your organization's mission and I am confident that my background and attributes will bring further support of your company's values.

My experience as a Junior Machine Learning Engineer at Wabu Tech and a Django Developer Intern at Level Nine Technology has equipped me with a solid foundation in developing and maintaining data pipelines, as well as optimizing data assets for quality and performance. I have worked extensively with technologies such as Python, PySpark, SQL, and cloud-based data platforms, and I am proficient in using Databricks and Snowflake to create scalable data solutions. In my previous roles, I have demonstrated strong problem-solving skills and the ability to work collaboratively with cross-functional teams to understand and meet client data requirements. My work on projects such as the Document Reader Chatbot, which utilized FastAPI and Streamlit, highlights my ability to develop innovative solutions and handle complex data workflows. Additionally, my involvement in Agile methodologies has taught me the importance of iterative development and continuous improvement.

I am very excited by this career opportunity and am interested in meeting with you to discuss further. I look forward to speaking with you about my academic and professional background. I am certain that my time-management and Problem solving strengths will bring an invaluable new facet to your existing team. I would like to schedule an interview to learn additional details of the position and explore the contributions I can bring to positively impact YoungInnovations success. Thank you for your time and consideration.

Sincerely,
Kabin Limbu
